

SENSE FOR DOORS

www.wipro.com   

Come in!

FAMILY OWNED BUSINESS SINCE 1955.

Greetings from Mühlviertel, in northern Austria. As a third generation family business, we believe in high quality workmanship, tradition and the value of a promise; something that has kept us successful since 1955. We are also excited to share our values of cosmopolitan design and forward thinking with you.

Every Wipro product is built to perfection by skilled craftspeople who are driven to create the best possible product for our customers. This is the essence of what we do.

As a family business building for generations to come, we think and act ecologically and economically. We have supported the development of small hydropower plants in our area and wind turbines in our neighborhood, bringing together progress and reason. Our customers receive products of innovative and sustainable quality.

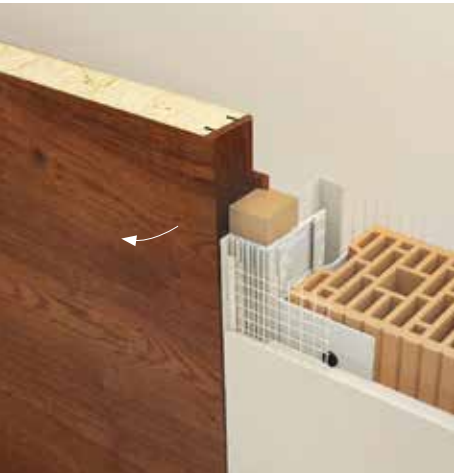

WIPPRO factory at Vorderweissenbach around 1960

shake on it!

Detail: FLAT

Detail: FLAT-IN

FLAT and FLAT-IN

Frame invisible, door leaf flush with the wall

With the revolutionary frame system "FLAT" and "FLAT-IN", the frame, door and wall all merge to form one complete unit. Frameless interior doors of all sizes, including ceiling-height, set completely new standards in interior design possibilities.

"FLAT" and "FLAT-IN" provide customizable options for swing direction. The key to these concealed systems is the perfectly developed aluminum frame, which becomes invisible when drywalled over.

Cross-sectional: The aluminum frame disappears into the masonry. This results in a clear view of the door and the frameless system.

Kristall Classic 1, RAL lacquered opaque mud grey, frame system FLAT, room-high without upper panel

Zitrin Q Classic 1, old wood spruce sunburnt 2B, frame system FLAT, room-high without upper panel

WIPRO ALPINE EDITION

Unique pieces, made from reclaimed and refurbished hard wood.

Different types of wood, surfaces and surface treatments:

- old wood oak, old wood spruce
- brushed, chopped, sunburnt,
- nature lacquered, natural effect, oiled

FORM MEETS FUNCTION

The frame systems "FLAT" and "FLAT-IN" avoid compromise. These interior doors are beautiful and functional at the same time, skilfully implementing interesting interior design.

Magnetic lock with striking-plate (4-way adjustable).
Luxury detail technology for the quiet "clack"
when closing doors.

TRY SOMETHING NEW

Stone finishes turn interior doors into monuments.

Living room doors with stone veneers are not only beautiful to look at, but even better to touch. By elevating these everyday objects, quality of life rises.

SLIM and SLIM-IN

This Hi-Tec-System connects the frame, door leaf and wall to the flush unit. The frame, made of multi-layer glued solid wood, looks perfect. In the Wipro factory all miters are glued, screwed and ground flat and thus prepared for high-quality painting.

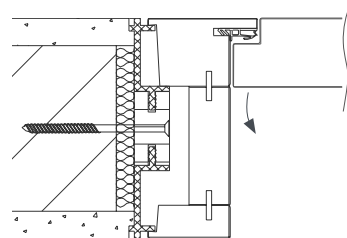

In the finished assembled element, the seals, hinges, magnetic lock and strike plate are already incorporated. With "SLIM-IN", the door opens into the reveal (see frame detail: SLIM-IN). The SLIM subframe must be installed before drywalling.

Cross-section: "SLIM-subframe" is unobtrusively integrated into the masonry. This results in a clear view of the wall-flush construction.

TWICE THE INNOVATION

Two model systems for better living.

Innovative technology, high-quality material and superior function.

Wipro doors with the „SLIM“ and „SLIM-IN“ systems are milestones in state-of-the-art living room design.

START WITH THE BEST INGREDIENTS

Love for materials and craftsmanship is in our blood.

Wood, the treasure of the forest, is where Wipro production begins.. Perfect processing of these high-quality materials is in our „Wipro DNA“ and every door that leaves the factory becomes brand ambassador of the highest quality.

Wipro entrance doors fit into the exterior of the façade and are matched to the interior of the living room doors.

THE MOST PERSONAL LIVING SPACES
 Wipro Doors provide incredible value and fuel interior design fantasies.

Whatever your personal style: doors need to do more than connect rooms. They need to be beautiful, function perfectly and add value to the own home. Wipro Doors do all of these things, while encouraging imaginative interior design.

SPACE SAVING

Sliding doors: true problem solving

Sometimes the opening radius of a door precludes the available space. Sliding doors solve these problems. Wipro sliding doors do it all. You can make them lockable, executed as pocked door or in front of the wall, just to name a few options.

Kristall Classic 1, sliding door, brushed bruce, white opaque, room high, disappearing into the wall

Alpin Edition frame: made of 3 layers of solid wood

Old wood interior doors, with a lot of history.

Solid core of spruce wood, covered with layers of real old wood, obtained from old floors, barns and roof trusses. The Alpin Edition interior doors can be perfectly combined with the Alpin Edition front doors. You can find more information about the Wipro Alpin Edition in our Alpin Edition brochure on our website: www.wipro.com

BEST IN GLASS

Elegant white; interesting glass.

Real elegance is usually characterized by unobtrusiveness. Glass doors are always an eye-catcher; they increase light within a space and can be designed individually. Most Wipro models are also available as all-glass doors.

SYSTEM MONOPLAN

The Monoplan system from Wipro combines innovative technology with the highest design standards. This system requires around 40% of the swivel room of a conventional door. Every door design is adaptable to this system. Monoplan are also easy to operate by wheelchair users and thus ensure accessibility.

Swivel range Monoplan

Suitable for wheelchair users

SYSTEM DUOPLAN

Also in the DuoPlan system from Wipro, the swivel room of the door is reduced by 40% compared to conventional doors. The door opens to the center and brings life into your home. With compensating strips and hidden hinges, installation in existing steel frames or masonry is possible. The DuoPlan is also adaptable to all other Wipro interior doors.

Swivel range DuoPlan

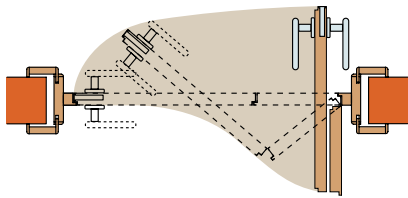

DuoPlan, double wing door

SYSTEM TRIPLAN

The Triplan from Wipro saves two-thirds of the swivel room of conventional doors. With the internal hinges, these space-saving doors are easy to move. Compensation strips and hidden hinges allow installation in existing steel frames or in the masonry. Triplan doors are also adaptable to all Wipro interior door models.

Swivel range Triplan

Door leaf running in the wall.

Door leaf running along the wall.

SLIDING DOOR SYSTEMS

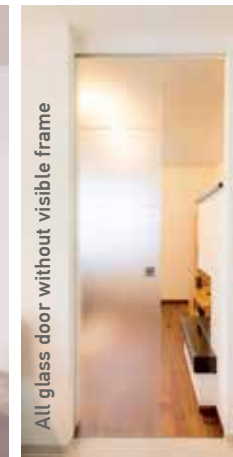

Perfectly adapted to your door concept, the high-quality Wipro sliding door box allows you to make the doors disappear in the wall. Wipro also offers perfect solutions running along the wall. Numerous surfaces are available to choose from. Beautiful wooden surfaces as well as lacquered sliding doors in RAL/NCS colors and also sliding doors of glass are possible.

Blunt frame connection

RENOVATION HIGH-TEC FRAME
Delivery as finished assembled element

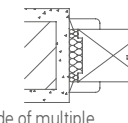

- Frame made multiple glued solid wood
- Door hinges 3-piece Anuba
- Cladding width 85 mm
- different edge designs
- Adjustment range + 0 mm / - 5 mm
- without removing the old steel frame only 15 mm loss per side

AVANTGARDE HIGH-TEC FRAME
Delivery as finished assembled element

- Frame made of multiple glued solid wood
- Door hinges 3-piece Anuba
- Cladding width 85 mm
- different edge designs
- Adjustment range + 0 mm / - 5 mm
- without removing the old steel frame only 15 mm loss per side

FRAME BAR HIGH-TEC FRAME
Delivery as finished assembled element

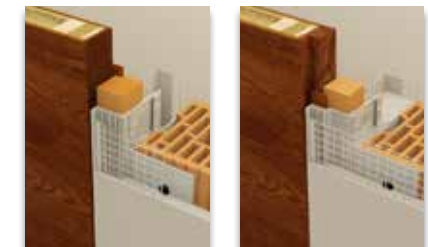

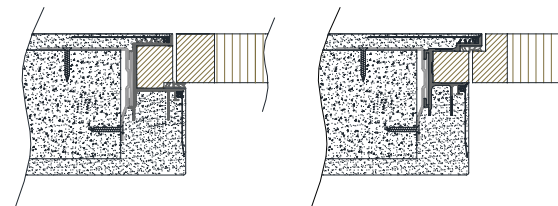

- Frame bar made of multiple laminated solid wood
- Door hinges 3-piece
- Stock width standard 80 mm
- Stick thickness 60 mm
- Production according to structural conditions

FLAT / FLAT-IN HIGH-TEC FRAME

The FLAT system is a fusion of frame, door leaf and wall. With the optically revolutionary frame systems "FLAT" and "FLAT-IN", Wipro sets new optical and SYSTEMSsal standards for frameless interior door elements.

At the heart of these concealed frame systems is an alloy frame perfectly developed down to the smallest detail, plastered and thus "invisible". Of course, these frame systems are also ideal for drywall construction. A firmly attached plaster net ensures a crack-free connection to the masonry even after years!

A section through the frame shows: The alloy frame as a SYSTEMSsal component disappears inconspicuously in the masonry. What remains is the clear view of the door leaf and an optically frameless door system.

ALL-GLASS DOORS

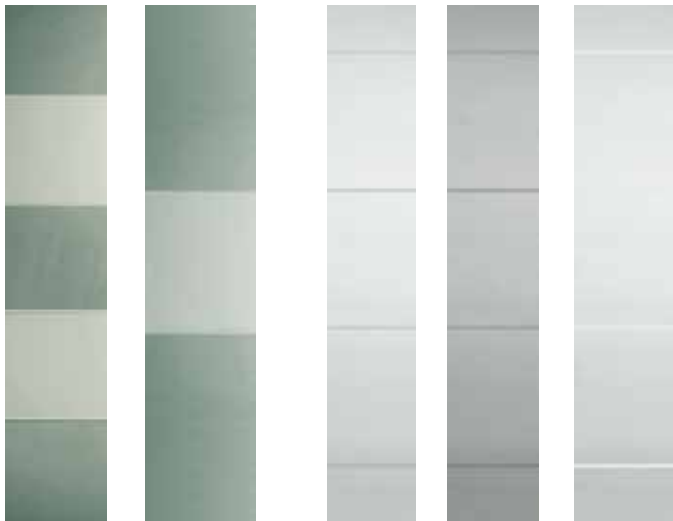

SPACE-SAVING DOORS

V230 V250 V252 V251 V270

Glass V251 is available without motif or in Pave, Uadi, Punto, Linea, Master-Carre or Oriental Night VSG. Float clear, Satinato or Reflo (V250) or Float clear with matt foil (V252). Those glasses differ due to their thickness and execution from the basic glasses V3. (required depending on model)

V270 with painted rim according to RAL

V81 V82 V276 V277 V278

Glass V81 and V82 motif matting model-related

V276 stripes matt, V277 fluted bevel motif, V278 digital print stripes clear. All these motifs are model-related.

COLORED PROTECTIVE SEAL % CLEAR SHIELD COATING

Matted glass with a surface seal can be achieved by a transparent "Clear Shield®" coating or a colored protective seal.

Examples colored protective seal and "ClearShield®" coating:

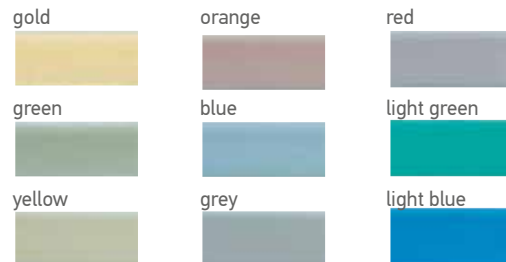

„ClearShield®“ coating

ClearShield® ...innovative surface protection system turns glass into precious glass.

Due to the special teflon-like coating or surface finishing, which is connected to the glass protects against sticking dirt and lime and it is largely resistance to environmental influences.

ClearShield® - glass ...with "nonstick" properties is resistant to soiling and much easier to clean. The Clearshield®-protection guarantees that the glass stays clear, clean and transparent for a long time.

Colours:

COLOURNUGGETS AND GLUED STONES

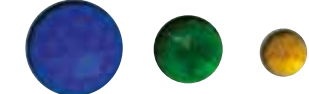

Depending on your preference, glasses can have your personal touch in shape of nuggets (colored decorative or UV-glued decorative stones)

Nuggetforms (coloures: red, blue, green, amber, clear, black)

round/smooth

round/polished

Rectangular/polished

Drop/polished

Pyramide/polished

Nuggetforms (coloures: red, blue, green, amber, clear, black)

Examples for glasses with nuggets:

V235 V240 V175 V195 V205

Frontdoors

Wipro entrance doors signal a higher quality of living. The façade is precisely adapted to the design, shape, color and material and can also be individually perfected in terms of safety. Safety bolts and access electronics are possible options.

Danburit Classic, old oak wood crosswise, weatherboard "Cortenstahl"

Alabaster Classic 1, RAL painted, real stone veneer "Black Line", LED lighting (accessories)

Alabaster Classic 1, RAL painted, real stone veneer "Black Line", glazing V270

Wipro attic ladders

WIPPRO is entering a new era with attic ladders.

This product is now available not only in the „BASIC“ version, but also with seamless bottom view. A new patent ensures that the foldable staircase disappears into the ceiling.

The sophisticated mechanism, which has made the WIPPRO attic ladder a bestseller for decades, has recently become a multi-faceted one - thanks to the WIPPRO development (patent number 504484), the staircase closes completely with the ceiling.

As a result, this innovative attic ladder is even more highly recommended than ever before for practical living space solutions. Where the visible gap has been an optical hurdle, the seamless cover completely conceals the hatch, an aesthetic alternative that is in demand in the construction of buildings, especially in the visible area.

Of course, the new WIPPRO attic ladder is also suitable for passive houses. A special insulation and appropriately adapted seals ensure that heat does not escape unnecessarily and the soffit door thermally separates when closing. Thus, the attic ladder is no longer a thermal bridge.

Automatic top cover can be retrofitted at any time

Seamless view

Lower cover overlaps staircase frame

Steep solution for flat roofs: Safe flat roof hatches.
